- **Career Objective:**

To pursue a challenging career and be a part of progressive organization that gives a scope to enhance my knowledge and utilizing my skills towards the growth of the organization.

- **Projects Details:**

CDAC Project

Project Name: An Online aid for Orphanages

Team Size : 7

Platform : J2EE, Angular

Role : Full Stack Developer

Duration : 1 Month

Description : An Online aid for Orphanages is a web application which provides an interface through which user can search the orphanages, set appointment, donate needful things to various orphanages. In this project we integrated the separate tasks like searching for orphanages, giving donation, scheduling appointment for visit. System provides a platform between orphanage administrators and donors. It also provides an interface through which donor can arrange events for orphans.

Engineering Project

Project Name: Zig-Bee Based Tracking And Monitoring System For Mine Workers

Team Size : 4

Platform : Zig-Bee, Java

Role : Backend Developer

Duration : 12 Month

Description : The system can real-time monitor underground environment and production parameters and intelligently give early warning by using a variety of sensors and wireless sensor network. It is flexible to add sensors and enhance stability of monitoring computer software and hardware modular. Experiments have proved feasibility and good stability of the system.
